

Q&A

Q: How big is the battery?

A: The 480 mAh battery is a lot smaller than the iPhone 5s 1570 mAh - it's primarily designed as an emergency power source

Q: If the USB port is up off the desk is the CARD BATTERY strong enough to hold my phone?

A: Yes. Both the USB and phone connectors are secure.

Q: Can I buy one?

A: We're primarily developing them for our campaign contributors, but they will eventually be available for around \$35.

Q: Is it patented?

A: We filed a design patent and will be filing provisional patents as we refine & finalize development.

Q: Do you have a Website?

A: Yes, www.cardbattery.com

Q: Are contributions from outside the U.S. acceptable?

A: Yes, please see payment and shipping information at the bottom of the page.

Q: What are the various payment options?

A: PayPal and Credit Card, but we prefer PayPal. It's quick, easy and safe, and provides good tracking info.

Q: What is the actual size of the CARD BATTERY:

A: It is 3.54 x 2.24 x 0.25 inches. By comparison, a credit card is 3.34 x 2.12 x 0.30 inches.

Q: Does the CARD BATTERY work with Android?

A: It features the 3 most popular charging connectors - Micro 5 pin, 8 pin and 30 pin, and works with most digital devices.

Q: Does it come with a guarantee?

A: Yes of course - nobody wants a product that doesn't work right. If it doesn't work for whatever reason please send it back and we'll replace it.

Q: If the USB port is up off the desk is the CARD BATTERY strong enough to hold my phone?

A: Yes. Both the USB and phone connectors are secure.

Q: If the USB port is up off the desk is the CARD BATTERY strong enough to hold my phone?

A: Yes. Both the USB and phone connectors are secure.
